

# REAL ESTATE ANALYTICS PROJECTS ATTRIBUTE MODELS

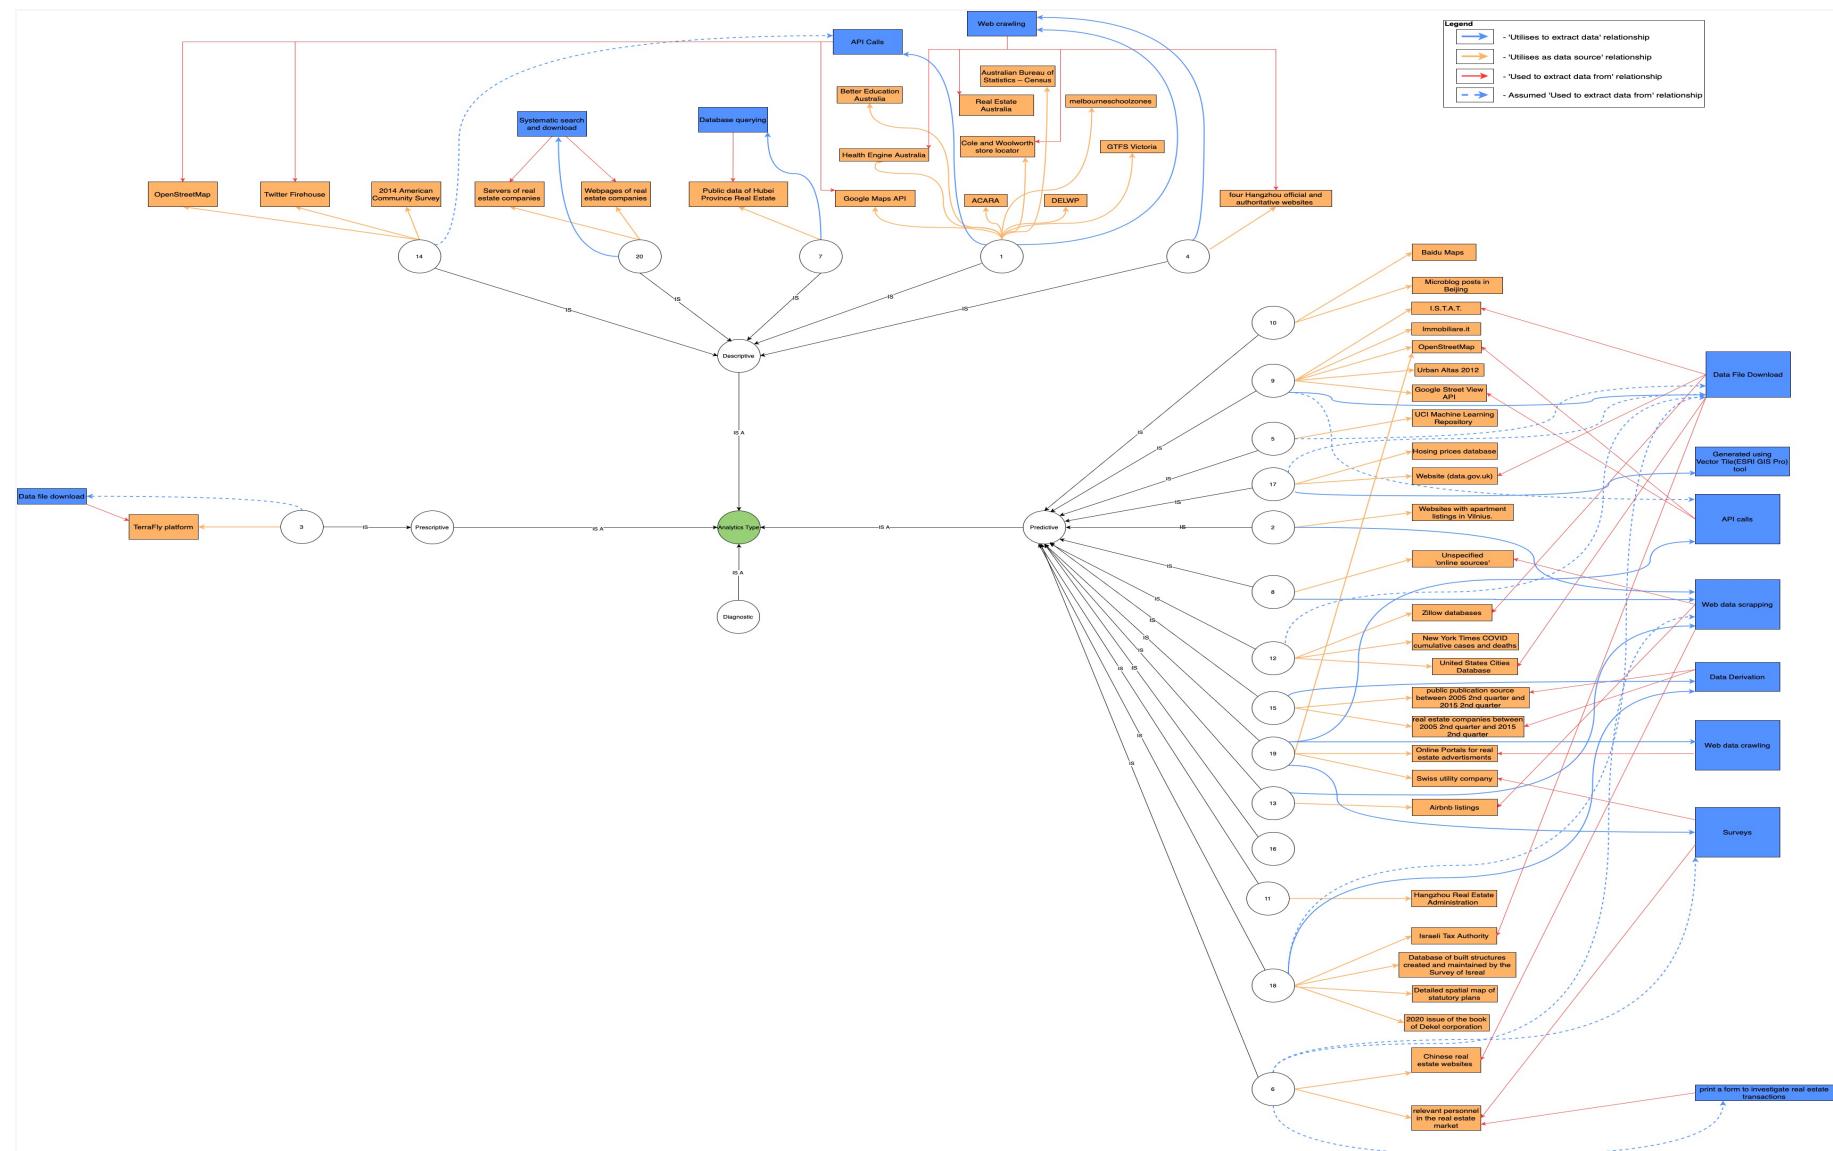

This document contains full sized real estate analytics attribute models.

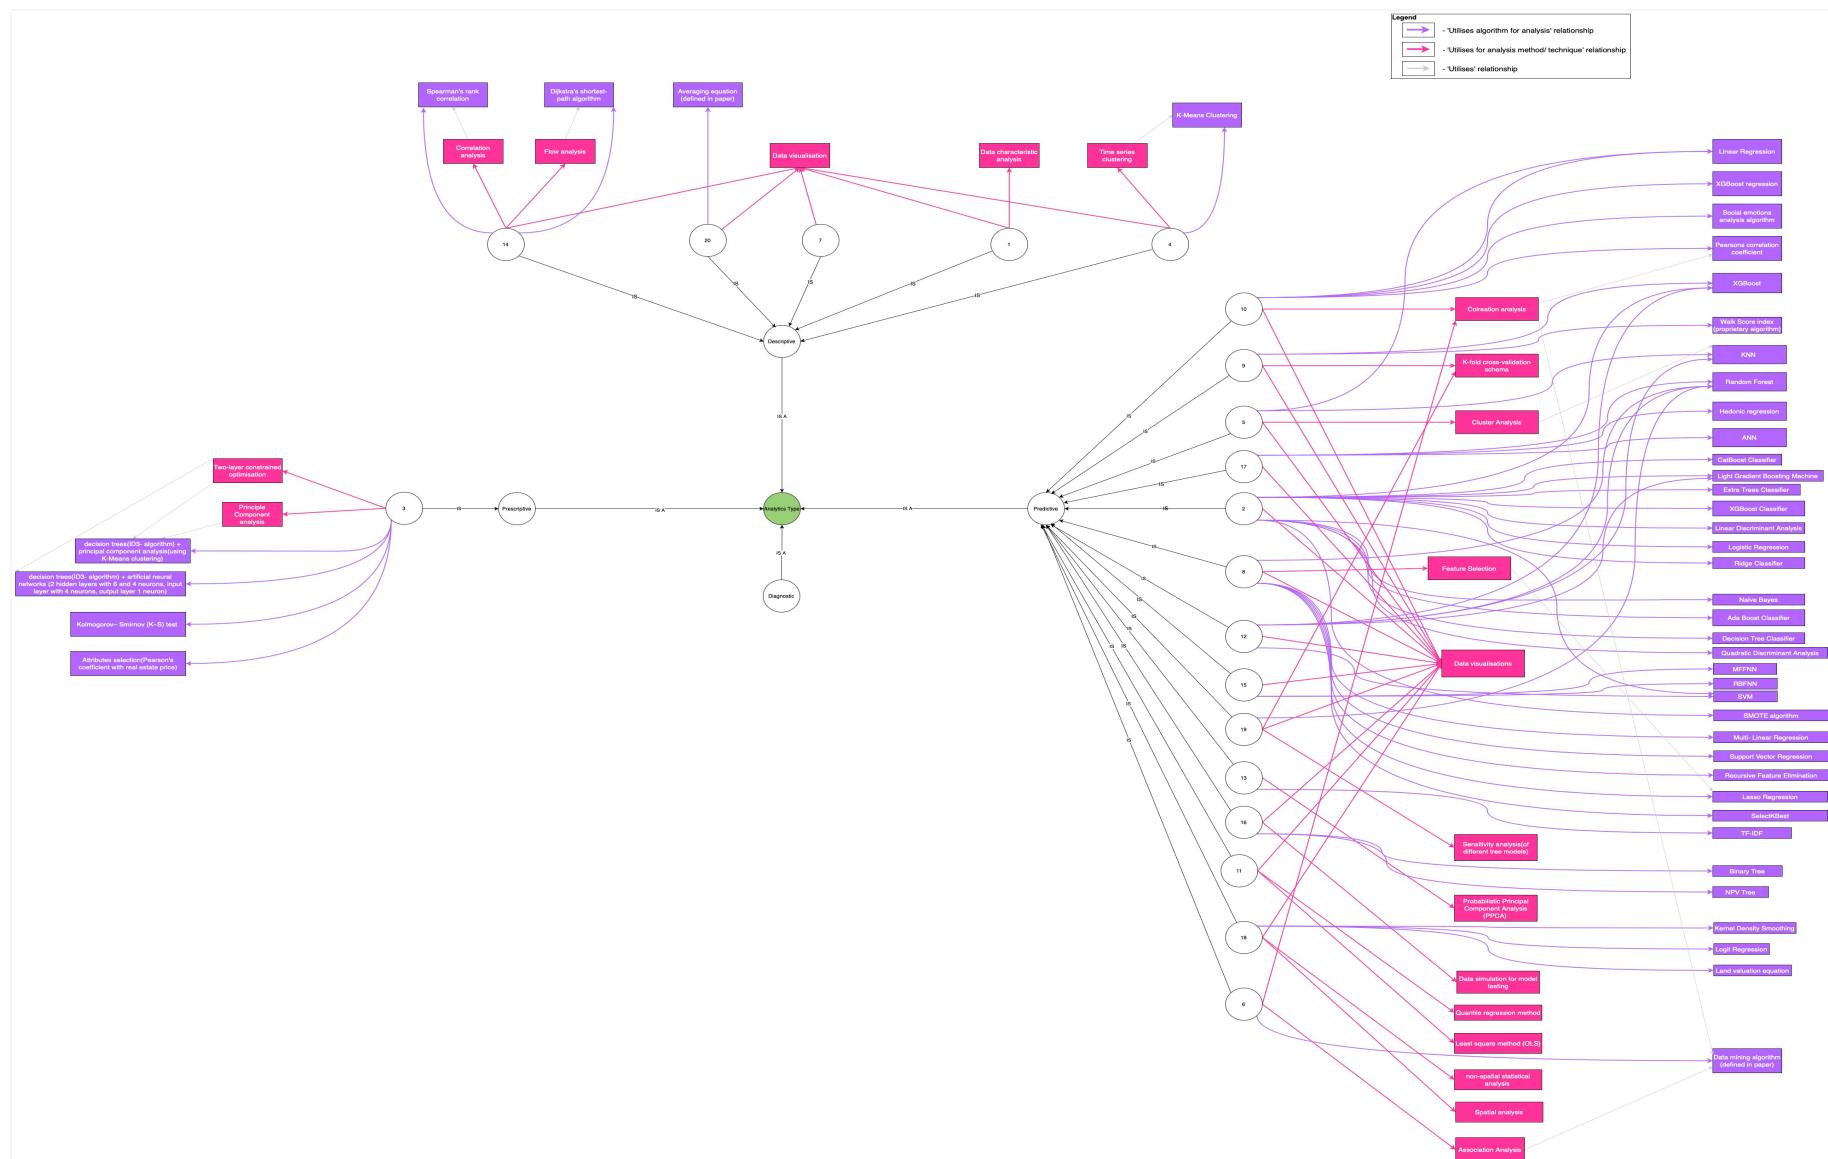

Model 1: Real estate analytics attributes model for Object/System/Measure of Interest (purple nodes) and Project documentation (pink nodes).

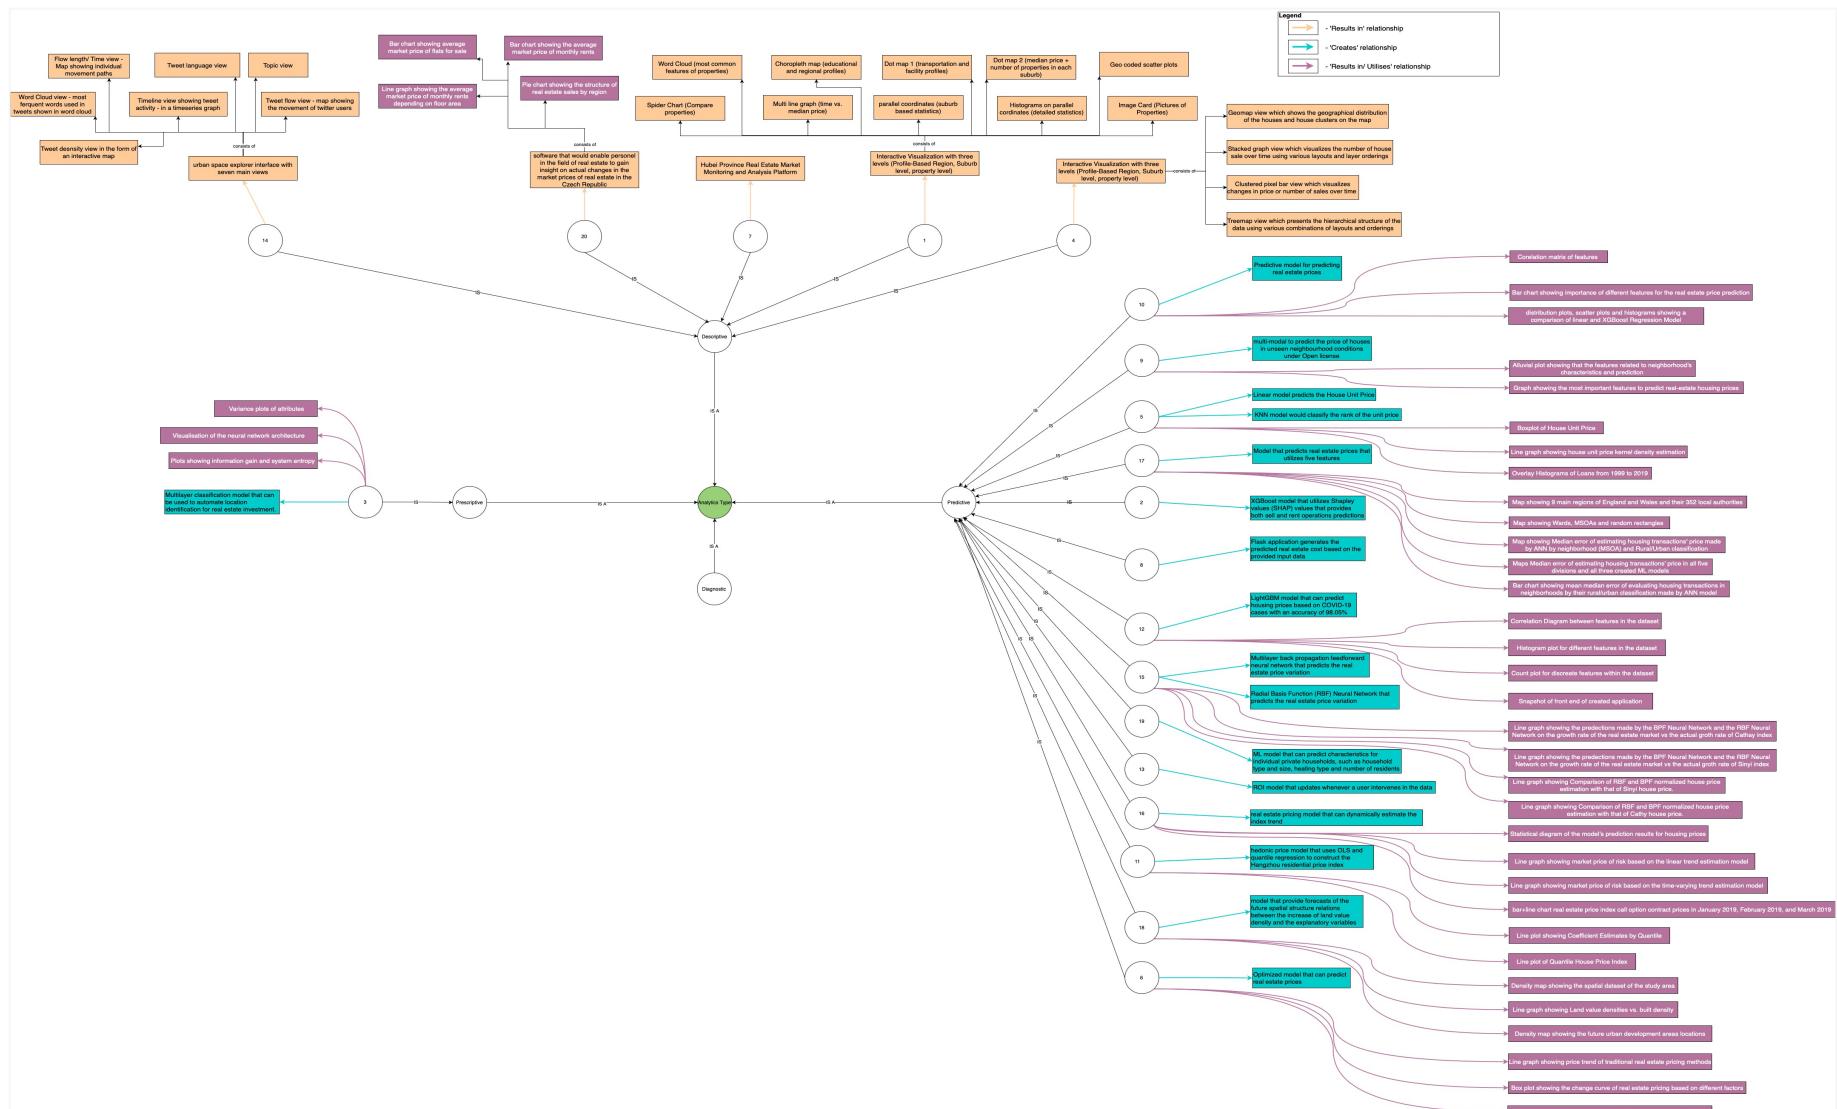

Model 2: Real estate analytics attributes model for data types(dark green) and datasets (light green) used.

Model 3: Real estate analytics attributes model for data sources (yellow nodes) and extraction techniques (blue nodes) used.

Model 4: Real estate analytics attributes model for analytics techniques/methods (pink nodes) and algorithms (purple nodes) used.

Model 5: Real estate analytics attributes model for the graphical (purple nodes), interactive(yellow), and models (green) results created by the analytics projects.
